Oceanside Seismic Data Set

POCS CD97-01

U.S. Department of the Interior
Minerals Management Service
Pacific OCS Region

Time,
Here is
a copy
of
the
CD
- Bob

"With so much proprietary oil industry seismic data collected off our coast during the 1970's and 1980's, we are delighted to bring the data and information contained on this CD-ROM to the public. This data set, collected by Jebco Seismic, Inc., was previously proprietary and unavailable to the public. As a result of special efforts by the MMS, these data are now publicly available. We believe these data are important and will be used as an instructional aid, as an academic research tool, to support earthquake hazards reduction investigations, and as a stimulant for industry to help further scientific thought into this geologically exciting area off our coast."

J. Lisle Reed

J. Lisle Reed
Regional Director
Minerals Management Service
Pacific OCS Region

Getting Started

The material on this CD-ROM can be used with Macintosh, Windows, and Unix based systems. To begin reviewing the contents of this CD-ROM Adobe Acrobat 3.0 must be installed on your computer. Versions of Adobe Acrobat 3.0 for Macintosh, Windows, and Unix along with installation instructions are included on this CD-ROM in the **ACROREAD** directory. Once this application has been installed, open the file **MAIN.PDF** located in the **MAIN** directory.

System Requirements

The minimum system requirements to use this dataset with the software provided on this disc are as follows:

- Macintosh Macintosh running System 7.1 or later
8 megabytes of RAM
- Windows IBM or compatible computer (486 or higher)
Windows 3.1, 95, or NT
8 megabytes of RAM (16 megabytes for NT)
- Unix HP, IBM, Sun, or SGI workstation
32 megabytes of RAM
